## REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

Prior arts of record do not disclose an apparatus for measuring propagation time of an optical fiber. The apparatus comprises: an averaging circuit coupled to a logic circuit for determining a d.c average voltage of a propagation signal, wherein the ratio of the d.c average voltage to a predetermined voltage amplitude is equal to the ratio of a propagation time to a predetermined period of the stimulus light pulses; a measurement circuit coupled to said averaging circuit for measuring said d.c average voltage; and a processor coupled to said measurement circuit for computing said propagation time by multiplying said predetermined period by said ratio of measured average voltage to said predetermined voltage amplitude which structurally arranged and functionally operated as claimed in claims 1,2.

Further, Prior arts of record do not disclose an apparatus for measuring propagation time of an optical fiber comprising: a filter coupled to a logic circuit for generating a d.c average voltage proportional to said propagation time; and an analog to digital converter for measuring said d.c average voltage; a microprocessor is coupled to said analog to digital converter and computes said propagation time as a function of a ratio of measured d.c. average voltage to a predetermined amplitude which structurally arranged and functionally operated as claimed in claim 6.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
